

**FloraSpher™** |

# Why is dispersibility important?

## Bad Dispersibility

Bigger particle size (bigger than expected) => Less specific surface => Loss of final properties like bio-availability, specific targeting...

## Good Dispersibility

Get most of the value of the raw materials AND your process (time and energy)

Our technology

**FloraSpher™**

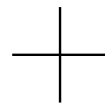

gives your product:

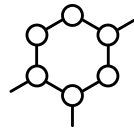

Higher dispersibility

Easy handling

Possibility to be easily mixed with other materials

Protection of the molecule

Prolonged release

Vegan formulation

Can be applied to any botanical powder

**Sphera Encapsulation**
